Did you know that for many government agencies the web is the primary means by which they communicate and implement their vision and mission goals? Surprisingly, many government organizations still struggle with developing an effective approach to web solutions that better serve citizens, businesses and local communities. How can you realize the full power of the web to exchange information, provide services, and transact with citizens, businesses, and other arms of government?

e-Management's customer-driven approach to web solutions helps clients reach their goals from concept to completion, on time and within budget. We start by helping you define the purpose for your web site and leverage our web experts, and CMMI[®] compliant processes and tools to help you design, build, and implement solutions to meet your needs—that's the e-Management difference.

e-Management can help you:

- **Design and implement Internet/intranet solutions**
 - Design, implementation, quality control, deployment, monitoring, and support of custom and commercial-off-the-shelf (COTS) Internet and intranet solutions
- **Manage your organization's enterprise information content**
 - Vignette Content Management System implementation
 - Livelink collaboration and knowledge management software
 - SharePoint content management, and implementation of business processes
 - Documentum Enterprise Content Management (ECM) platform implementation
- **Build or configure custom applications to support your mission objectives**
 - Customization and support of open-source applications
 - J2EE and .NET framework implementation capabilities
 - Java, C++,C#, ASP, PL/SQL, TSQL, XML, XSLT, Tcl, Perl, Ruby on Rails, HTML, JavaScript implementation capabilities
- **Develop Service-oriented Architectures (SOA)**
 - SOA implementations using J2EE and .NET frameworks
 - Integration of dissimilar applications
 - Single sign-on capabilities across an enterprise
 - Help desk and operational support
- **Optimize your databases**
 - Setup, configuration, troubleshooting, maintenance and operational support of Oracle 10g, 11g, MS SQL Server 2005 and 2008, and MySQL 5.0
- **Implement data warehousing solutions**
 - Setup, configuration, troubleshooting, maintenance and operational support of Oracle Data warehouse 10g and 11g
