

# Maximizing the Value of Government Resources through IT Governance

## *New webinar from e-Management!*

As current federal budget challenges require agencies to do more with less, it is as important as ever to maximize the value of information technology (IT) resources. In order to balance increasing expectations of the IT function in government agencies with diminishing IT budgets, IT Governance is necessary to provide the leadership, organization structures and processes that ensure the agencies' IT sustains and extends strategies and objectives.

Mr. Becraft's presentation will identify and explain the IT governance focus areas as well as address best practice implementation approach.

### *In this webinar, participants will learn:*

- > How to leverage IT Governance to ensure that government agencies are getting adequate return from investment in information resources.
- > How IT governance can ensure against IT-based surprises to senior management.
- > How IT governance can be used to exploit discovery and execution of IT strategic opportunities.
- > How successful implementation can drive a culture of IT governance.

### *Who will benefit by attending this webinar:*

Business Executives, Chief Information Officers (CIO), Program and Project Managers, IT Sponsors, Business Process owners, Enterprise Architects, CPIC professionals
